## Mayor F. Aboussafy Succeeded by Mayor W. Hawreluk of Edmonton

Mayor William Hawreluk of Edmonton, was elected president of the Union of Alberta Municipalities Friday, succeeding N. E. Aboussafy of Coleman.

Delegates at the annual convention chose Mayor Ross L. Ellis of High River, as first vice-president, and Mayor J. M. Stone of Jasper Place as second vice-president.

Named to the executive were: Mayor Don Mackay, Calgary; J. A. Beveridge, Red Deer city commissioner; J. E. McLeod, Olds secretary-treasurer; Mayor E. P. Tanner, Magrath; C. P. Pals, Castor councillor; Mayor B. Gunn, of Rimbey; and Mayor T. R. Haig, Lethbridge.

**Lethbridge Chosen**

Lethbridge was chosen as the site of the 1956 convention.

Delegates at the concluding session voted to have the executive change the name, as suggested by Mr. Aboussafy, to the Urban Municipalities of Alberta.

An adopted motion asked the executive to study the hospital-care problem with a view to making recommendations to the provincial government.

Another resolution approved by delegates endorsed the principle of increased financial hospital and medical aid for "senior citizens" and directed the executive to act on the problem.

### Sales Tax Idea

Provincial Treasurer E. W. Hinman in a luncheon address, advanced the idea of a sales tax to help pay for special services, such as roads, sidewalks, etc. Mr. Hinman emphasized the idea is not proposed government policy.

"A sales tax is a pretty legitimate one," he added. "It can be collected by a central government."

Speaking of provincial government grants to municipalities, the minister said:

"Why not the idea of a single grant which you could spend as you like? . . . Would it be entirely wrong if we said to some municipalities: 'You have so many people, we will give you so much money.'"

Mr. Hinman said signs of maturity in municipal governments showed up in demonstrations of responsibility and ability and competence to act on a general set of principles. He said the electors look for intelligence, knowledge, foresight, power to evaluate and make decisions, and drive in the persons they name to run their affairs.

Approved motions asked the provincial government to:

1. Amend the Town and Village Act so that annual elections should be held on the same date as those in Alberta's eight cities;
2. Exempt all fire-fighting apparatus from sales tax;
3. Change the Public Libraries Act to permit issue of debentures for construction cost of permanent buildings for a term of at least 25 years when desired; and
4. Pass legislation authorizing local health units to purchase and operate trailers for dental services where approved by the health minister.

## St. John Ambulance Elect Officers

The St. John Ambulance Association held their annual meeting on Sunday, October 22. The main business was the election of officers.

The slate of officers are as follows:

President, E. X. Hill, vice-president, W. Hammer; secretary, J. Kilgannon; International committee, E. Hill and W. Hammer; Line Works, M. Dorville and F. Slavik; Tow committee, C. Clarke and P. DeCocco; High school, Miss P. Kilgannon, W. Irwin and D. DeCocco.

Honorary presidents, P. Harquail, D. Young, M. P. Nelson, R. M. Greenhalgh, J. Rushon, W. Fraser, E. Hill, W. Goodwin.

The meeting went on record to hold the annual New Years Eve dance. Classes will be resumed every Sunday at 10 a.m. in the high school auditorium.

## Remembrance Day Plans Well Advanced

The plans for Remembrance Day Ceremony are well advanced according to the Legion committee handling these matters.

The parade will start from the Legion at 9:15 a.m. and proceed to the Roxy Theatre for a public service conducted by the Rev. Mr. Dykes, and assisted by Rev. Mr. McCauley and Captain Arkansull.

Following this service, all will proceed to the Cenotaph for services and the laying of wreaths.

A very colorful ceremony has been arranged for the theatre service and all are requested to attend. According to plans as laid out by the committee in charge of this program, it will really be outstanding and something which all of Coleman can be proud. The complete Remembrance Day program will be printed in our Remembrance Day issue. As this is very important you are requested to read it carefully so that you will not miss any part of the service.

## Hallowe'en Party

Mrs. G. Horn's Mission Band entertained their mothers and members of the W.M.S. at a Hallowe'en Party in the clubroom on Wednesday. Decorations included witches, pumpkins, cats and spiders. Many unusual and comical characters were represented by the children's costumes. The mothers were entertained with games conducted by Mrs. R. McAulay and Mrs. R. Lowe. The children played games and then presented a number of songs including "Fishers of Men," "Climb, Climb up Sunshine Mountain," "Open up Your Heart" and "Birds Upon the Tree Top." A lovely lunch was served by Mrs. Horn and her helpers. Thirty children were present and twenty one ladies and all expressed appreciation of the party. The Mission Band meets every Wednesday at 3:30 p.m. in the clubroom. Mrs. Horn was assisted by Mrs. R. Lowe, Mrs. W. Liddell and Mrs. A. Hallidorsen. Children from four to eight years are welcome.

## Coleman Lion's Club Initiates New Members

At a recent meeting of the Lion's Club three new members were initiated into the club. These were Ted Kryczka, James Duncan and Graham Atkinson. Dr. E. Leisner was reinstated back into the Lion's.

Following the business meeting Constable H. K. Slobod of the R.C.M.P. at Blairmore showed some color slides on Aklavik and other points of interest taken during his stay in a northern post. The members of the club thoroughly enjoyed this interesting talk.

## Red Cross Notes

The ladies of the Coleman Branch of the Canadian Red Cross Society have resumed their work of sewing, quilting, knitting, etc. for the fall. The meetings are held every Wednesday afternoon at 2 o'clock in the basement of the Canadian Legion. New members are most urgently needed. Everyone interested in this worthy work is welcome to attend these meetings.

**CHRISTMAS  
NOVEMBER 26th**

## Oil Geophysicist Guest Speaker At Board of Trade Meeting

Mr. Robert Brown, geophysicist with the Cal-Standard Oil Co. was the guest speaker at the Board of Trade supper meeting Thursday evening.

J. Kerr introduced Mr. Brown to the gathering, and stated that Mr. Brown would give an outline of how his department goes about charting possible oil-bearing formations. Mr. Brown thanked the Board for inviting him to address the meeting and stated that the area that they are now exploring for possible oil deposits was the same as the Big West Texas field.

He went into considerable explanation as to how and where they test for oil, and the different kind of formations. He definitely stated that oil was in these foothills as gas had been discovered and where there is gas oil is also found.

As to who would find the oil first and to how long, he did not know. He did state that there were five companies testing, but that it may take anywhere from 10 months to 10 years for them to find the main pool of oil.

He stated that the very cost of building roads into the test sights was terrific, as much as \$150,000 have already been expended on one road in the Race Horse Creek district.

During a question period, Mr. Brown was asked what he thought of the future of this area, and he stated, in his opinion, it was terrific. On the question of whether a possible petro-chemical industry would be established in the Pass if oil was found, he stated it was very possible, depending upon the

company involved. Mr. Brown said that he expected to see a large number of oil men in this area in the spring, as they attempted to find the oil deposit, and that the wells would quite possibly be as deep as 12,000 feet.

Mr. Brown was sincerely thanked by all members present for his very enlightening talk, and he left the meeting with a high degree of optimism in the future of Coleman.

Other important business to come before the Board was a request from the Alberta Association of Chamber of Commerce for a survey of this area in regard to possible industry locating here. To make this survey the Board appointed Dave Young, Jack Caldwell, Adam Wilson and Harold Nelson.

A brief from the Waterloo Board of Trade was outlined in regards for further improvement to the park, which was endorsed by Coleman. Entrance signs were discussed for the east and west entrance to Coleman, and this matter would be referred to the Alberta government for further consideration.

Two members were appointed to represent the Board on the Community Sports Association: W. Fraser and O. Celli being picked.

Mr. Freeman informed members that the Board dues were now due.

Mr. Caldwell reported on his recent attendance at a Crow's Nest Pass Tourist Association meeting, and of what the B. C. government had in mind with regards to the road from Elk to the border.

## Crows Nest Miners Second In Production

Mines in the Crow's Nest Pass were second highest in coal production in the province during September, with an output of 71,115 tons. J. A. Dutton, provincial director of mines, reports Drummeheller was first with an output of 96,677 tons.

Coal production in Alberta during the month was down 23,863 tons from September last year, when the output reached 374,486 tons.

Output in Lethbridge mines was down from the September, 1954, total of 13,963 tons, by 70 tons.

September production figures in the district, with totals for the corresponding month in 1954 in brackets, are: Crow's Nest Pass, 71,115 tons (70,141); Brooks, 2,666 tons (4,316); Champion, 540 tons (562); Taber, 3,747 tons (2,957); Pakowki, nil (7); Redcliff, 510 tons (2,961).

There are more than 1,000 buffalo in Elk Island National Park, Alberta.

## Plan Concert Series Crows Nest Artists

With winter months fast approaching, a series of variety concerts are again being prepared under the direction of Alice Buckna of Blairmore. The programs for this year are being planned to provide every form of entertainment to suit every individual taste. The programs will feature children with outstanding musical and other talents. Taking part in the affair will be the dancing students from the studio of Mrs. Clem Jepson of Bellevue who will present their version of the "Toy Makers' Dream" when all the dolls of Toy Town shop come to life. Colorful costumes in the Tony Tots "Dutch Dance," and the Ukrainian Trio are certain to please all that attend the concerts.

Piano solos, duets, accordion ensembles and the Crows Nest Pass Senior Piano Association group will provide enjoyable listening. Music, dances and songs of many lands will also form a major part of the lengthy variety program.

All proceeds from the concerts are earmarked for community purposes. In order to give residents of all Pass towns an opportunity to see the excellent talent in our local towns the concerts will be held in each of the Pass towns with dates to be announced as arrangements are completed.

## Winners At Canadian Legion Bingo

Sweet was really running off yours truly on Friday evening as a goodly crowd was really out after those two jackpots, but were unable to get them in the required numbers. This could have been attributed to the fact that Mr. Bond arrived late and so the folk decided that they would wait for him, well they waited too long this time. And don't let Bert state that we did not treat him right, I watched him sticking checks into those two cards long mad, in fact he almost succeeded in winning one.

Well here are the winners: No. 1. Mary Kubin, chickens. No. 2. H. Newton-Cribb and accessories. No. 3. Mrs. Belk Sr., chickens. No. 4. J. Hardy, antiferre. No. 5. Baby Jackpot consolation. A. Kryvot, cash. No. 6. Mr. Wood, chickens. No. 7. Mrs. G. Field, consolation and ashtrays. No. 8. Vic Belk chickens. No. 9. Marie Kinneer, double sided dart board. No. 10. Jackpot consolation, Mrs. I. Root. Other consolation winners were, Mrs. A. Hardy, Mrs. I. Raymond and M. Juhlin.

## Coleman Dart Players Lose To Hillcrest In Tournament

Last Thursday evening a large number of dart players from the Legion journeyed to Hillcrest to participate in the tournament sponsored by the Hillcrest Miners Club.

According to reports Coleman boys started off good but final results found them in the losers' department. Hillcrest boys took all the prizes.

1st prize, Slugs Lozzar and Joe McNeil; 2nd, Slim McNeil and Ross Carlson; 3rd, Henry Monti and Tom Podgorenko, and 4th position was won by Dave Hariton and Matt Linderman.

## Poster, Essay Prizes Are Presented By Firefighters

BLAIRMORE — Fire Chief Tom Gibos of Blairmore announced this week that an excellent variety of posters were entered in the poster contest held for children of the Blairmore school in conjunction with the annual fire prevention week.

Prizes were awarded for posters from grades 1 to 10 and three prizes were awarded to the high school for the essay contest held for the high school students. All children from Grades 1 to 3 received treats from the fire brigade. Town foreman Guido Martini and fireman John Dobek, Art Plant, John Gibos visited the school Friday and presented the winners with their awards.

## Poppy Symbol of Sacrifice and Remembrance

(The Story of the Poppy)

During the Napoleonic Wars, a thoughtful and observant writer remarked on the intimate association the scarlet poppy had with the graves of those who had fallen in battle.

In the First World War millions had the opportunity of observing this phenomenon in France and Flanders. They saw spires from the earth where their fallen comrades lay, a vast profusion of poppies waving defiantly at the terror of warfare and hiding from view the starkness and grimness of the beaten earth. Newcomers to the field of battle remarked on this to their comrades, and seasoned veterans replied, "Yes, it's like this every year, but they seem to increase in number each time they blossom."

### Origin Unknown

It is impossible to prove that the idea of associating the poppy with the blood shed in sacrifice by our gallant warriors originated with any one particular person in any one particular case.

In Canada the earliest reference to the Flanders Poppy as a symbol of remembrance is contained in an excerpt from the minutes of a meeting of the Great War Veterans Association held at Port Arthur in July, 1921. It reads: "Following a motion suspending the regular order of business, Madame E. Guerin, 'The Poppy Lady of France,' was presented to the conference and invited to outline her suggestion as to the adoption of the poppy as a national emblem to be worn on Armistice Day in memory of fallen comrades. It was moved by Comrade Hamilton, that this conference representing the Dominion Command of the G.W.V.A. of Canada hereby approve the proposal that the citizens of this Dominion of Canada accept the poppy as its flower of remembrance and recommend that the poppy be worn on the anniversary of Armistice Day."

The first poppies sold in Canada were also those made by women and children of France. But the next year, following the leadership of the British Legion, the poppies that were sold on the streets of our towns and cities were made by disabled Canadian veterans who understood only too well their significance.

Each year the number of poppy emblems distributed throughout Canada has steadily increased until last year over four million poppies were worn by Canadians. It has come to mean a source of grace in time of trouble and hope for the future. It has become a source of useful employment for disabled veterans both in the Veterans Shops and in the homes of those unable to stand the strain of regular employment.

## BULLETIN

## Thieves Enter White Rose Service Station

Two youths who were apprehended at Cardston early Wednesday morning in possession of a 1953 stolen car from Cranbrook, recently broke into the White Rose Service station in the early hours Wednesday morning. Entry was made removing a pane of glass and loss of the goods and cash was reported to Chief of Police E. Corsan. No charge has been laid against these two youths by Coleman police. The car theft charge from Cranbrook will include his crime.

## A mountain blew up in Iceland years ago and a new community was born in Manitoba

Many years ago in Iceland a mountain blew up and the people fled. For most their flight brought them to Manitoba. Nearly penniless, their belongings packed in one or two battered trunks, many of the Icelanders chose pine-covered Hecla Island, Manitoba, lying off the west shore of Lake Winnipeg to start a new life. They named the island Hecla after the volcano that drove them from their homeland, writes Walter Gray of Canadian Press.

Civilization came to Hecla in 1916. Today, the second and third generations still carry on the traditions and the way of life of their forefathers.

### Fishing families

Hecla islanders make their living from the lake. Most of the 300 residents come from fishing families.

In June and July the Icelanders stow their gear on their boats and sail 200 miles north to whitefish waters. In September and October they fish closer to home. Following freeze-up they are out over the ice around the island until the break in March.

During the summer the islanders fish much the same way as their grandfathers did. But the bombardier has revolutionized winter fishing.

Where previously the fishermen loaded their equipment on dog-drawn sleds and camped on the windswept ice for days, now they skim the lake in high-powered snow vehicles for a day's fishing and then return home each night.

Only in recent years has island living been made easier for its residents. The first settlers had a life of misery. Thirty unmarked graves stand as a memorial to the

smallpox epidemic that all but wiped out the pioneers soon after their arrival.

Helgi Jones — Johnson is the family's Icelandic name—says the pioneers had "terrific pride."

"All during the depression, even though they didn't have a cent to their names, not one soul asked for relief," the 30-year-old fisherman-resort operator said.

Before 1953 Hecla island could be reached only by air or boat. The SS Kenora calls twice weekly during the summer on its run from Selkirk to Warren's Landing on the north end of the lake.

In 1953 the provincial government built a road down the island and installed a four-car ferry to

### SMILE OF THE WEEK

A woman walked into a millinery shop and pointed out a hat in the window.

"That red one with the feathers and berries," she said. "Would you take it out of the window for me?"

"Certainly, Madam," the clerk replied. "We'd be glad to."

"Thank you very much," said the woman, moving toward the exit. "The horrible thing bothers me every time I pass."

move traffic from the mainland to the west. Two years ago the Manitoba power commission strung a power line from Riverton, 28 miles southwest.

"The island's affairs are governed by the local school board. The children attend two schools, one of two rooms and the other a single-room unit. Motion pictures are shown in the local hall once a week and the islanders attend services in the Lutheran Church.

Most islanders live in the village of Hecla, on the east side of the island. Eight miles further north is Gull harbor, site of an old government fish hatchery, a government dock and Helgi Jones' Gull harbor lodge.

During the winter Helgi fishes with his father Beggi, 65, and his brothers Blinn, 38, and Beggi, Jr., 26. And for the last two summers he has been running his lodge.

Off beaten track. Few vacationers have discovered Hecla. The road into the area, 100 miles north of Winnipeg, would frighten the best of drivers should he attempt it during a rainstorm. But in good weather he is rewarded by white sand beaches and some of the best lake swimming in Manitoba.

Across the channel are the picturesque islands — Black, Little Punk, Big Punk and Deer—all still in their virgin state.

Deer and moose roam the Hecla woods and on the west side of the island is a marsh that natives say is alive each fall with migrating waterfowl.

The island's real asset is its people. The Icelanders' door—and their food lockers — are always open to the visitor.

"Icelanders make the best coffee, the best fish and the best vinrieta," says Helgi.

Vinrieta — wine tart — is the Icelandic cook's specialty. It consists of five thin layers of cake separated by ribbons of fruit paste. A dessert fancier's delight.

## Home Workshop

This is a good husband and wife project. When the carpentry is done the lady with needle and thread takes over. The set shown in the sketch consists of five framed armchairs padded with extra batting and covered with heavy textured material, chintz or plush as preferred. Use 3½ yards of 36-inch material for each

unit without arms; and add 1½ yards for each arm. The arms are finished separately and then bolted in place. Spring cushions or foam rubber may be added for extra comfort. Both carpentry and upholstery directions are illustrated step-by-step with large clear drawings on pattern 369 copy of which will be mailed for 35¢.

The desk and chair in the above sketch make excellent projects for advanced students in shop work. The picture frames, lamp and book ends are more suitable for beginners. The exposed parts of

the desk are of plywood which may be obtained in many sizes. The surface of natural wood. The large pieces of plywood are easy to cut and assemble. The pattern illustrates each step from list of materials to the final finish. The chair is made with pattern 224; the lamp is 204; the initial bookends 401; and the plywood picture frame is made from pattern 301. These patterns are 35¢ each. All five copies will be mailed to one address for \$1.50 postpaid.

Address order to: Home Workshop Patterns Service, Department P.P.L., 4433 West Fifth Avenue, Vancouver, B.C.

## Many Canadian children still not immunized says doctor

TORONTO.—"For many years, protection against smallpox, tetanus, diphtheria, and whooping cough has been available to every Canadian child, but when we examine records, it is quite apparent that we are not taking full advantage of the benefits afforded by immunization," states Dr. C. S. Anglin, staff physician for the Hospital for Sick Children, in an article written specially for Health Magazine, official publication of the Health League of Canada.

## Fashions

For half-sizers

4629 by Anne Adams

Especially for the shorter, fuller figure—this slimming step-in—accented by a new and dramatic collar detail. Picture this in crepe, faille, or cotton — you'll gather compliments galore wherever you go! Proportioned to fit—you won't have a single alteration worry!

Pattern 4629: Half Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ takes 4 yards 39-inch fabric. This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35¢) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to:

Department P.P.L., Anne Adams Pattern Dept., 60 Front Street W., Toronto

He said that while these diseases should be matters of historic interest only in our country, over 200 persons die unnecessarily from them each year in Canada, while many times this number suffer a severe illness often accompanied by serious complications resulting in permanent disability.

Dr. Anglin pointed out that of all the infectious diseases of childhood, whooping cough causes by far the worst ravages in Europe and North America, according to the World Health Organization. In the years 1940-43, whooping cough killed three times as many children as measles, mumps, smallpox, scarlet fever, diphtheria, polio and meningitis combined. The last available statistics for Canada show that there are over 8,000 cases of whooping cough a year reported in Canada each year, and nearly 150 deaths a year from this disease.

"In an analysis of the cases of whooping cough seen at the Hospital for Sick Children, Toronto, during the past year, 85 percent of the children with whooping cough had received immunization. This is a sad commentary of the interest shown by some Toronto parents," he said.

Dr. Anglin wrote, this article to draw attention to the importance of immunizing against these diseases, the goal of Canada's 12th National Immunization Week.

## GEMS OF THOUGHT

### PREJUDICE

Ignorance is less remote from the truth than prejudice.—Denis Diderot.

Prejudice, which sees what it pleases, cannot see what is plain.—Aubrey de Vere.

Ignorance, pride, or prejudice closes the door to whatever is not stereotyped.—Mary Baker Eddy.

He who knows only his side of the case knows little of that.

—J. Stuart Mill.

A common prejudice should not be found in one whose trade it is to rectify error.—James Boswell.

Prejudices, it is well known, are most difficult to eradicate from the heart whose soil has never been loosened or fertilized by education; they grow there, firm as weeds among rocks.—Charlotte Brontë.

## OUR COMPLETE SHORT STORY—

## THE DIAMOND

By KURT VON FISCHER

ON THE "Nieuwe Kade" in Amsterdam, the quay where the big liners serving passenger traffic to London and the most stood a man with a cigar between his lips. Though seemingly calm, leaning on the balustrade and contemplating the green waves washing over the granite squares of the wall, he viewed with furtive excitement a policeman, who stood motionless, legs apart, some 10 yards away.

The man with the cigar casually turned his back towards the uniformed figure. He was of small, lean stature, with an olive complexion and thin, black moustache. Nobody would have suspected him to be the well-known diamond grinder Willem Verhaert, popular society figure of the town, whose mysterious disappearance half a year ago had busy engaged the attention of police headquarters of many a European capital.

Suddenly the man threw his half-finished cigar into the water. Then he took out another one from his pocket and lighted it. He deeply inhaled the smoke, puffing it out nervously.

Had the policeman grown suspicious? Was everything to go wrong at the very last moment, the plan of one year to be nullified? Carefully, he took the Havana from his mouth and hid it between his quivering palms. Could the policeman suspect that, hidden in an artificially cooled capsule in the middle of the bulging tobacco leaves, was the missing Vijzel diamond?

For years Verhaert had been one of the most esteemed diamond grinders of Amsterdam's flourishing industry. But though the worth of millions ran through his fingers he had never succeeded in achieving more than a moderate financial position. Now he was nearing the fifties, a bachelor and filled with feverish greediness for the luxuries of life.

And it was then that he determined upon and planned the great coup. A lucky coincidence had delivered the unique chance into his hands. The Vijzel Diamond, newly found in South Africa and the

tenth largest in the world, was given to him for grinding.

Soon the papers had a sensation. The well-known grinder Verhaert had disappeared together with the precious stone. While the police blocked and checked all roads and means of transportation, the prince in all this excitement sat in his ingeniously prepared hide-out in a cellar and subjugated his body to a torture.

By hunger, excessive sweating and endless gymnastics he reduced his weight by many pounds during a few weeks. The policy Verhaert changed into an emaciated creature. Staining of his skin with permanganate of potash, a moustache dyed with henna, and a big expanse of bald head in place of the former flaxen mane of hair created the French champagne salesman Emile Verlon, bearer of the forged passport.

Half a year in the dark and then he risked the step across the frontier. Once in London, a new life could begin. During passport inspection everything went well; not even his own mother would have recognized him. The customs control was exceedingly thorough, the officials still searching for the vanished diamond. He was even subjected to a body inspection. But during the whole procedure he flauntingly chewed his Havana, right under the eyes of the officials.

For two months he had laboriously worked on the manufacture of this cigar. A mere phony would certainly have aroused the suspicion of the officials. But he had succeeded in producing an effect out of real tobacco leaves, which gave quite a natural impression. The perfectly smokable and still covered the diamond in its middle. Finally came the blessed word: Passez! He had succeeded.

And now, when only embarkation remained, now, after he had cleverly overcome all critical situations, now, in the very last moment was everything to come to naught?

What could this damned policeman have noticed about him? Could he have recognized him? Impossible! Or did he, by heavens, suspect the cigar? Not very likely, either. But why was he, now, staring at him?

An icy chill froze his limbs. The policeman was stepping towards him.

"Give me the cigar, my son?" he heard a cold, hard voice say. Willem Verhaert closed his eyes, his knees shook. He was not the type to resist. He was cunning but not brave. Also after his terrible loss of strength he would have been physically unable to fight.

He fatalistically awaited the clicking of the handcuffs.

The policeman still stood facing him. He even smiled amiably now. "You know, sir," he said, throwing the cigar carelessly into the sea. "The building over there is the gasoline dump. Smoking is strictly forbidden here!"

These days most people work under pressure, very more, than of old. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "fired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulates the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug center.

## Manitoba co-ordinates rehabilitation

A new provincial program which will co-ordinate and expand all skills and services required for the rehabilitation of disabled persons has been launched in Manitoba.

The program has been designed to assist handicapped civilians to earn their living and to assume normal social relationships as far as they are capable.

Hon. R. W. Bend, minister of Health and Public Welfare, paid tribute to the many voluntary agencies that have been providing rehabilitation services to meet specific needs in years past. He pointed out, however, that some disabled persons are unable to qualify under any of the existing services.

To co-ordinate the efforts of all these agencies and to fill in gaps in the over-all program, the minister stated, the Society of Crippled Children has been appointed Central Rehabilitation Agency for the Province of Manitoba.

The appointment was recommended by the Rehabilitation Commission established several months ago to study the services offered the disabled in Manitoba. The Society of Crippled Children, it was noted, has been providing excellent rehabilitation services to crippled children and to persons of all ages disabled by polio.

The new agency is responsible for providing a comprehensive medical, social and vocational assessment of all disabled persons referred to it by the Provincial Co-ordinator of Rehabilitation. It will also provide services which a disabled child or adult may require to achieve total rehabilitation.

The provincial program will be assisted by three financial grants from the Federal Government.

First of these will be a contribution of fifty percent of the cost of maintaining a provincial co-ordinator responsible for organizing and supervising the various programs in the province.

Another \$70,000 will be provided for expanding present medical services and for adding new services to assist disabled persons not included in any existing facilities.

Under the Canadian Vocational Training Agreement, formalized vocational training or on-the-job training will be provided for disabled persons.

While these grants provide the tools with which the job of rehabilitation can be done, Mr. Bend stated, its effectiveness "will depend entirely upon the close cooperation between the voluntary agencies, medical profession, hospitals, schools and employment services."

### Farm low spots can produce hay

Low spots on the farm can produce substantial quantities of hay or pasture, advises Robert L. Pharis, Alberta's supervisor of crop improvement. In late summer, many of these depressions are free of water and are dry enough to allow the use of tillage machinery. This is the time to break up the native growth and prepare for late fall seeding of forage crops, says Mr. Pharis.

Reed Canary Grass is ideal for situations where prolonged flooding occurs and alkali is not a problem. This grass can stand at least seven weeks of flooding after it has become established. Alsike clover, though it will not persist under excessive flooding, is superior to other legumes for silage and line wet locations. Tall Wheat Grass, while it is coarse and produces only fair forage, is tolerant of alkali.

The recommended seeding rates for the pasture mixture are Reed Canary 5 lbs. per acre and Alsike Clover 2 lbs. per acre. Suggested hay rates are 4 lbs. and 3 lbs. respectively. Some timothy may be added to the mixture as it does well where moisture is plentiful.

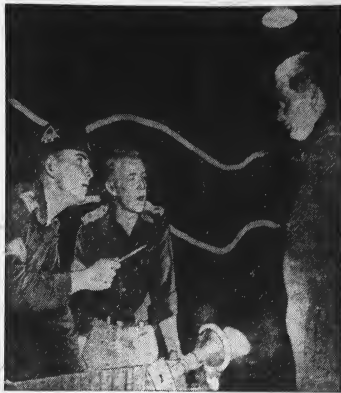

As with other forage plantings a firm seed bed is required and depth of seeding should be no greater than one-half inch.

**ANSWERS TO QUICK QUIZ**  
5. More than \$30 million a month. 3. Steel production decreased by more than one-fifth. 1. Alberta, 2nd to Ontario. 4. For the past two years other nations have sold to us more than they have bought from us. 2. Nearly two-thirds of all immigrants are women and children.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

### DECODED INTELLIGRAM

1—October. 2—Strongest. 3—Has. 4—Argentina. 5—Rebellion. 6—Opal. 7—Was. 8—All Saints'. 9—Harvey Ward. 10—Football's.

**THE QUESTION—**"Prisoner," right, stands in the eye-searing glare of floodlights as "the enemy" questions him in interrogation room at Sted Air Force Base, Nevada, where the Air Force conducts an antirainwashing school. Stripes on wall form one portion of painted effects designed to prove psychologically unswerving to men being questioned. Some 20,000 volunteers have been processed through the controversial 17-day course, which the Air Force says is designed to teach airmen what to do and how to survive in case of capture.

### Strictly Fresh

City fathers of Bellare, Minn., have put the community jail up for sale, stating that "it might make a good zoo." Local shady characters apparently think otherwise, as there's been no monkeying around to necessitate maintaining a policy.

Fellow in Detroit, Mich., has had his thirst slaked for from three to 15 years. Threw a chunk of con-

crete through window of a closed bar and helped himself to a few drinks "because I was thirsty." He's now in, instead of at, the jug.

Pranksters in Huy, Belgium, switched road route signs, causing majority of a group of motorcyclists to wind up in one-way streets and muddy fields. Local traffic experts, take note.

Adela Rogers St. John was up at Helmet, Calif., at a time the whole area was parched. Citizens decided to hold a monster meeting and pray for rain. After a half-hour of earnest supplication, the preacher told everybody to go home and await results — everybody, that is, except one young gentleman about 11 years old.

"Why," the preacher was asked, "are you asking that boy to stay with you and continue praying?" "Because," observed the preacher, "he's the only one who had the foresight to bring an umbrella!" And 15 minutes later, didn't it rain!

### WEEKLY BIBLE COMMENT

REACHING OUT IS HALLMARK OF CHRISTIANITY

"Outreach" is a good word for the Christian church. It began by reaching out, and missionary enthusiasm and activity have been its deepest characteristics through the ages.

Jesus reached out for His first disciples. He did not take those nearest at hand, or those among the officially religious, to whom a religious leader might naturally have appealed. He reached out into the common life, and took fishermen and others of lowly, but very active, occupations to be of the inner circle.

He wanted workers—those who would be fishers of men—reaching out and gathering others into the Christian way.

Even if the disciples had not been ready and willing to obey the Master's command to go into all the world and preach the Gospel to every creature, events gave them little choice. The persecution that broke out scattered them, but they had learned well the Master's lesson, and they proclaimed the truth and won disciples.

The world needs as never before the saving, healing, purging power of Christianity and the church, and the church, if it will, can meet that need as never before. The church—that is, the people in it—must, in these days, manifest in new and powerful ways the "outreach" in which the church began.

In Canada, more houses are heated with oil than with any other fuel. 3163

## The Sports Clinic

(An official department of Sports College)

### Are you a "natural" athlete?

Chances are you have heard either yourself or some other sports star referred to as a "natural athlete." Chances are you've believed it, too.

But any psychologist will tell you that a person isn't born with skills of any type. A baby doesn't know how to skate or throw a pass. The individual acquires these skills through practice of the right kind. People are born only with physical and mental powers or talents that can be well adapted to certain activities—it's a matter of finding the activity and the special part of that activity for which nature has suited them.

For example, a person may be born with a type of body that is ideal for swimming. Another may be born with a type that is adapted to running a mile. The problem arises when the person with the swimmer's body tries to run a mile, and the miler tries to play football.

No matter whether you are playing the game for competitive fame or just for the fun of it, your best plan is to test yourself carefully to find out the game and the part of that game for which you are best suited. In a sense, everyone is born a "natural athlete." The great athlete is made when he selects the game for which he is best suited and uses all the other secrets of success—proper practise, attitude, etc.

**What to do about "stitches"**  
Every athlete has probably been

bothered at some time or another by a "stitch," particularly if they are taking part in an endurance event.

Many medical experts claim that the most logical cause of a stitch is the formation of intestinal gas. Most of them will agree if you continue what you are doing. But sometimes a stitch becomes very severe, getting more and more painful until you can't stand it.

When this happens, the best thing to do is stop and raise the arm on the side on which you have the stitch. Really stretch it upward. Rubbing and massaging and bending at the waist also helps.

Here's the important thing to remember. A stitch in the side is not serious—it may hurt but it won't injure you in any way if you keep going as hard as you can. So, remember this the next

### Quick Canadian Quiz

1. What province recently moved into 2nd rank in value of mineral production?
2. Of the annual total of immigrants to Canada what percentage are women and children?
3. In 1954 did Canadian steel production increase or decrease from the previous year?
4. Currently which has the greater value, Canada's imports or Canada's exports?
5. In 1945 the federal civil service payroll was \$15 million a month. What is today's monthly payroll?

### INDUSTRIAL ACCIDENTS

Many accidents that occur in industry could be prevented by care on the part of the employee. Devices to protect him from typical accidents in the shop or plant have usually been developed by authorities in the field and should be used whenever available.

time you feel like quitting or easing up because of a stitch—you can work through it, if you really want to.

## Ten Word INTELLIGRAM

Check the correct word:

- 1—Big Four foreign ministers meet in Geneva, Switzerland (Oct.) (Nov.) 27.
- 2—Hurricane Ione was billed as (strongest) (weakest) of this year's tropical storms.
- 3—President Juan D. Peron (has not) (has) resigned.
- 4—He was president of (Brazil) (Argentina).
- 5—He stepped down because of (ill health) (rebellion).
- 6—October's birthstone is the (topaz) (opal).
- 7—October (was) (was not) at one time the eighth month of the year.
- 8—Nov. 1 is known as (All Saints') (All Souls') Day.
- 9—United States Amateur Golf Champ is (Bill Hyndman) (Harvey Ward).
- 10—Alonso Stagg is known as (football's) (baseball's) "Grand Old Man."

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

Answers to be found in another column on this page.

### Must provide

#### for bathtubs

DUESSELDORF, Germany. — The German Society for Bathing demanded that all new houses be furnished with bathtubs and all old dwellings be remodelled to accommodate tubs as soon as possible.

Bathing Society President Ernst Boehm said, "A house without a bathtub is like a person who doesn't own a toothbrush."

## Personalities IN THE NEWS

Miss Marie Smith of Regina, Sask., is the guest of her Aunt, Mrs. Florence Smith.

Mr. and Mrs. R. Donaldson and son Bobbie of Cranbrook, B.C., visited the latter's parents Mr. and Mrs. A. Dewar over the week-end.

Mrs. K. Johnston visited her daughters Mrs. F. Gimell and family and Miss Laura Johnston at Calgary over the week-end.

Mr. W. Anderson has returned to Coleman after spending some weeks in Vancouver the guest of Mr. and Mrs. S. Colley.

Mr. O. Fry has returned after visiting his daughter Mrs. Berkenshaw at Calgary.

Mr. Nels Anderson now employed at Calgary, spent the week-end at his home here.

Mr. Wm. Plante of Red Deer was the guest of his parents Mr. and Mrs. J. Plante over the week-end.

Mr. Alex. Cornett of Red Deer was the week-end guest of his parents Mr. and Mrs. M. Cornett.

Miss Joan Emery of Coaldale formerly of Coleman, was successful in winning a \$600 I.O. D.E. Scholarship this year. She has completed her Grade 7 and is serving an apprenticeship in a Lethbridge Drug Store. Next year she will enter the University of Alberta to study Pharmacy. She is the daughter of Mrs. Jennie Emery who teaches in Coaldale. Joan is also a niece of George Heibeln.

Mr. J. Howarth returned on Sunday from a two weeks vacation spent at San Jose, California, visiting friends there. John reports the weather in that part of California as being really wonderful and enjoyed the trip both going and returning.

Born to Mr. and Mrs. M. Wecko, of Brooks, Alta. (formerly of Coleman) a daughter Barbara Eileen, on Monday, October 10th.

Friends here will be sorry to hear of the death in Vancouver of Mr. T. Goldring, father of Mrs. R. Campbell of Coleman. Mr. Goldring was an old time resident of Coleman.

Miss Joan Coover accompanied by Miss Vera Holmes both of Calgary, were this week end guests of the former's parents Mr. and Mrs. C. Coover.

Mr. and Mrs. J. Nash have returned after a three week holiday spent at Kimberley, visiting with their son-in-law and daughter, Mr. and Mrs. Ken Blain and Mr. and Mrs. E. Hutton. Mr. and Mrs. Blain accompanied them back to Coleman and spent the week-end here.

Miss June Kilgannon, student nurse at St. Michael's Hospital in Lethbridge, spent the week-end with her parents, Mr. and Mrs. James Kilgannon.

Mr. and Mrs. Dave Young were Edmonton visitors this week.

Mr. and Mrs. J. Wavrecan were Lethbridge visitors this week.

Mrs. J. Dick is visiting in Edmonton with her daughter, Mrs. F. Girhny, who is again a patient in the University hospital.

Ken Fry, stationed at Victoria, B. C., with the Royal Canadian Navy, is at home visiting with his parents, Mr. and Mrs. O. Fry.

Mr. and Mrs. W. Dutil have returned from Calgary where they visited with their son-in-law and daughter, Mr. and Mrs. W. Roper.

Mrs. W. Ford and Miss Sandra Stevelak were lucky winners of Tombola prizes at the C. W. L. bazaar held in Bellevue.

Mr. and Mrs. J. Jones of Lethbridge visited over the week-end at the home of Mr. Jones' mother, Mrs. L. Jones.

Mrs. G. Jenkins visited at Calgary last week. She continued on to Edmonton with her husband, who is attending the meeting of mayors and municipalities being held there.

Mayor P. Aboussaty and T. Collier were in Edmonton last week to attend the meeting of mayors and municipalities.

### Card of Thanks

We wish to thank all our friends who were so kind as to send us flowers and sympathy cards during our recent sad bereavement in the loss of our father, Mr. T. Goldring of Vancouver.

Edna and Bob Campbell.

### Mr. Herb. Hewitt Succumbs in Edmonton Hospital

Coleman residents were shocked Monday to hear of the death of Herb. Hewitt in the Edmonton General Hospital on Sunday afternoon.

Mr. Hewitt, 46 years of age had lived in the 'Pass the greater part of his life having left here in July to work with a firm of engineers in Edmonton. He attended public and high school in Blairmore and then went to the University of Alberta. He was first employed as an engineer for the Hillcrest-Mohawk Collieries, later going to Sudbury, Ont. where he worked for four years. He returned to Coleman and became employed with the International Coal & Coke Co., later the Coleman Collieries, from 1942 to 1955.

Mr. Hewitt took an active part in the Coleman Curling Club and the Crows Nest Pass Square Dance Club.

He is survived by his mother, Mrs. Hewitt of Frank, his wife, Mary, and two children, Richard and Dianne, all of Edmonton; a sister, Madeline, Mrs. Jack Little of Winnipeg.

Funeral services will be conducted from the Howard and McBride Funeral Chapel in Edmonton at 2 p.m. on Thursday, Nov. 3.

### Letters to the Editor

Coleman, Alberta,  
Oct. 25, 1955.  
Thos. Holstead, Esq.  
Coleman Journal,  
Coleman, Alberta.  
Dear Mr. Holstead:

At the last meeting of the Cole-

man Board of Trade, it was brought to our attention you had provided without charge, a large number of posters advertising Coleman's free camp shelter.

We feel that you have contributed in no small measure to the growing popularity of this tourist accommodation which has been advertised through poster distribution as far west as Trail, east to Lethbridge, south to Waterton Park and several miles north on No. 2 highway. Reports are still being received from points where posters have been noticed.

The Board is very proud of this shelter, and of those who have helped in any way to make it attractive and make it known.

On behalf of the Coleman Board of Trade and the residents of this community, we would like to express our very sincere appreciation for your thoughtfulness and generosity in providing the posters. We feel too, we voice the sentiments of the travelling public who have been made aware of the facilities provided in Coleman, only through your very fine gesture.

Yours truly,  
J. R. HILL,  
Secretary.

## West End Annexation Discussed At Blairmore

A meeting was held in Blairmore Union hall Tuesday afternoon to discuss the possible annexation of West Blairmore to Blairmore proper. The meeting was attended by R. D. Henderson, chairman of the Board of Public Utilities Commissioners, and H. G. Rose, a member of the board. The town of Blairmore was represented by Mayor William Gray and Councillor William Jalpep, and town solicitor, S. G. Bannan, while the West End was represented by approximately 14 persons. Mr. Bannan presented the following brief:

"This is an application by the town of Blairmore to have that part of plan 2347 B.S., lying west of Bellevue Avenue, the present western boundary of the town and which comprises blocks five to eight inclusive and blocks 19 and 20, annexed to the present town limit.

"The application is made under the provisions of section 35, subsection three of the Town and Village Act which is as follows: Notwithstanding sub-section two, the Board of Public Utility Commissioners in its sole discretion, upon the receipt of a resolution from the council of a town requesting it, may include within the town any territory adjacent thereto to which, from the proximity of streets or buildings or the probable future exigencies of the town, the council may seem desirable to include therein or to annex thereto. The resolution of the council of the town of Blairmore requesting such annexation has been filed with the board.

"The area proposed to be annexed is wholly within Local Improvement District No. 10 and the Blairmore school district No. 628. The plan of sub-division was prepared in the year 1913 and registered in the year 1917 and in the

latter years there were but few buildings on the whole area. In the intervening years there has been a steady growth in building and in the territory proposed to be annexed there are now one garage and service station, one general store, two motels of varying units and about 47 other residential properties.

"The 1954 assessed value of the land and improvements was approximately \$72,000 based on figures supplied by the Department of Municipal Affairs. The school population prospective and otherwise is not less than 31 attending schools at present. The proposed annexation will result in equalized taxation, provided fire protection, snow clearing, garbage removal and enable the inhabitants of the area to participate on an equal footing in enjoying the benefits and advantages to be provided by the Municipal skating and curling arena now on the eve of opening."

### Speaks for Town

Councillor William Jalpep, speaking on behalf of the town, said the proposed area to be annexed forms a natural part of the town, since it is separated from the town of Blairmore only by a width of street. The school population from this area utilizes the facilities of the schools in the town of Blairmore.

The water for this area is supplied by the town, and very often at a loss to the town. In 1954 the town spent \$21,801 on water utilities while water revenue amounted to \$15,196. At the present time the citizens of Blairmore are subsidizing water utilities in this improvement area. At the same time the rate for this utility in this area is the same as in the town. Free thawing service is provided during the winter. The town provides the machine, maintains it and pays the labor to operate it at no extra cost to the consumer. Our Blairmore taxpayers are, therefore, carrying the expense.

The citizens in this area have always received fire protection at

cost, that is, it did not cost the people in this area anything above the wages if firemen.

With respect to sanitation and general sanitary conditions each citizen in the west end area undertakes his own garbage removal. This has not proved very efficient. The town of Blairmore is prepared to extend sanitary services to this area, which on the average will be less expensive than at the moment to the citizens of this area, said Coun. Jalpep.

With the completion of the new Blairmore arena, the citizens of Blairmore anticipate considerable profits and advantages to the various businesses in town resulting from the many sports activities.

For all practical purpose, the town of Blairmore has always regarded the citizens of this area as part and parcel of the town. On various occasions, such as important civic functions (for example the Jubilee Celebration), the town has always extended to this area all facilities to participate with the rest of the citizens of Blairmore. Such full participation in civic functions has resulted in the feeling on the part of these citizens that they are really a part of Blairmore.

Having heard the views of the town representatives, E. C. Cossick, representing the West Canadian Collieries, was of the opinion that sufficient time had not been given to those concerned to fully consider the effects of annexation. The notices were sent out on Oct. 7. In reply to this, Mr. Henderson advised that should any protests arise they may be sent by letter to the board within the next ten days as a decision on this matter would be reserved until such time.

F. E. Millett, another resident of West Blairmore, said the question of annexation was brought in at a poor time as a number of people were leaving town and the mill rate would probably be going up. He also felt that the arena would not make money and this again would result in an increased mill rate. In regard to fire protection Mr. Millett felt that the town of Blairmore would out of humanity's sake supply fire protection in the case of an emergency.

### Motel Owner

Max Brown, a motel owner of West Blairmore, advised that he had been advised by William Kovach, M.L.A., that had not this annexation question been pending that the streets in the West end of Blairmore would have been paved by the government this year. Mr. Brown asked that if annexation were completed would the town be prepared to compensate for this loss.

In reply to this Mayor Gray said a paving program would eventually get underway in this part of town. Mr. Brown also asked that should the west end be incorporated into Blairmore would there be representation on the Blairmore council from the west end. Mr. Gray advised that a citizen from this area would then be eligible to run for council office.

Mr. Henderson advised the meeting that should any other protests arise that letters could be sent to the board within the next ten days. Mr. Henderson announced this as the majority of persons attending the meeting were housewives who felt that the meeting was held at a poor time as their husbands were at work in the mines, and could not be present.

### Start Base Course On Pass Road

The road construction crew building the new No. 3 highway through from Bellevue west to Coleman have this week commenced laying the base course on the road surface.

The work has started at the east end of Bellevue, much to the relief of motorists who have had to contend with terrible roads all spring and summer while the road-way was being constructed.

Meanwhile the bridge crews working on two new bridges over the Crow's Nest River have centred all operations on the new concrete bridge over the river at Frank.

The men are pouring cement daily and it is expected that the bridge will be opened to traffic soon. The work at the bridge in west Blairmore has progressed as far as getting the pilings into the ground and cement pillars built.

Bridge work is under the supervision of Len Frayn.

Anyone who plans to retire during the next ten years can help to make retirement enjoyable and useful by planning hobbies and sparetime occupations (profitable, if necessary). It often happens that retiring from a busy life to an idle one causes mental and physical shock.

**THE ONLY TEARS** shed in Winnipeg when the last street car rattled down Portage avenue, were those on the tram itself, making its last trip. It ended a transportation era for Greater Winnipeg, which spanned a 73-year period. Winnipeg was the last city in Western Canada to switch to all-bus service.

**HANG YOUR SHIRT ON A KAPOK LIMB**—That's what Ecuador's Ministry of Economics would have you do, as it announces that it is making large tracts of land available to those who would cultivate the living "general store," hitherto harvested only from wild growth. Bark is used in manufacture of twine, sacks, nets, hammocks and cloth. Hairlike fruit fibre, lighter than cotton, is used for stuffing floats, life preservers, cushions. Seed fibre, very elastic, far exceeds cork in floatation qualities and is used in lifesaving devices, clothing and upholstery. Seed also yields oil for soap making and feed cake for livestock. The Kapok tree is said to be both rain and drought resistant.

**CHALLENGERS**—Floyd Patterson, left and Nino Valdes, are seen by the experts as best bets to challenge Rocky Marciano for his world heavyweight crown.

**HEAVY 'DOUGH' KNEADED FOR BREAD OF KNOWLEDGE**—Importance of endowment and gift funds in financing the college students' education is checked by Dale Conley, Oberlin College, Ohio, senior, as he hands freshmen Daphne Michaelides, center, and Carol King, a reminder of the debt their class of 560 would have to assume if the gift monies were not available. The whopping \$1,040,000 represents about half the academic expense of putting the class through a four-year course, according to college actuaries.

**MR. SINCLAIR HOME FROM RUSSIA**—Hon. James Sinclair, Minister of Fisheries, who was seriously injured in a fall while inspecting fisheries installations, in Russia, limps off a plane at Vancouver. He suffered a fractured left leg and a spinal injury that left him partially paralyzed.

**THIS PICTURE** of Mr. Eisenhower was taken just 24 hours before he was stricken with a heart attack.

A single codfish will produce as many as nine million eggs.

**HERE'S HOW**—Dress uniforms for ceremonials such as the Changing of the Guard at Buckingham Palace feature those 20-inch-tall shakos, not worn as part of a British service uniform since 1880. Nearly as old as the traditional headgear is the question: "How can the guards see while wearing those things?" Maj. Alistair Ritchie of the Queen's Own Scots Guards, now making a United States-Canadian tour, reveals the secret. There's plenty of vision between combed out hairs which fall across the eyes.

**IN GOODS HANDS**—Football's grand old man, Amos Alonzo Stagg, puts his 93 years of wisdom at the disposal of Billy Parton, 8, whose dad is a back for the Mustangs of California's Stockton College. Stagg, who has been coaching for 66 consecutive years, is advisory coach for the Mustangs.

**PORTABLE GREENHOUSE**—Black suede handbags shown at a leather fair in Offenbach, Germany, is topped with a plastic "greenhouse" in which milady can place flowers to enjoy on some gala evening. Chemied keeps bouquet fresh for hours.

**MAKING-UP A BREEZE**—It is, if you have a handbag such as this one, recently shown in Offenbach, Germany. Tiny dry battery concealed in the brocade-covered, feedbag-type leather accessory powers a compact-size fan concealed under the lid.

**NEW FASHION NOTE FOR MEN**—British postage is due for record sales if Donald Dunton's new fashion note takes hold. The London designer adds button novelty to a red tweed sports suit by using a stamp framed in clear plastic to button the flap of a hip pocket. The stamp bears the likeness of the Queen.

## Frozen north wilderness may blossom

The Russians are considering building a mammoth dam across the Bering Strait and warming the Arctic Ocean with Pacific water pumped across by atomic power.

Alexander Markin, a member of the Soviet Academy of Sciences, said over Moscow radio this would transform the frozen northern parts of Asia, North America and Europe into habitable areas with a temperate climate.

Markin didn't mention the floods it might cause along more southerly coasts by melting the Polar ice cap.

The Bering Strait between Alaska and Siberia connects the Arctic and Pacific oceans. It is 55 miles wide.

Markin said Soviet engineers visualize damming it and then using hundreds of giant pumps powered by an atomic power station of 2,000,000 kilowatt capacity to pump Pacific water into the Polar sea.

"This would produce an artificial warm current approximately equal in volume to that of the Gulf Stream," Markin said.

"Each year this current would carry as much warmth into the Arctic Ocean as is contained in 10,000,000 tons of oil. Of course that would greatly moderate the climate in the Arctic zone and adjacent continents."

"Furthermore, by smashing the famous Siberian anticyclone and eliminating conditions of great masses of cold Arctic air, we would deliver not only Asia and North America but also part of Europe from the frigid breath of the Arctic."

The result, Markin said, would "be something like discovering new continents with a mild European climate and with wonderful natural resources. What is now barren and frozen wilderness would blossom."

## Rainbow trout unlimited here

Norris Lake, situated about 11 miles northwest of Teulon, has become Manitoba's first lake for "put and take" rainbow trout fishing. It has been announced by Hon. Charles E. Greenlay, minister of Mines and Natural Resources.

The "put and take" system means that the department is making use of suitable shallow lakes for rainbow trout fishing, even though such lakes will not carry fish over winter.

Under the system, all regulations concerning size, daily creel limits and possession limits are suspended. Anglers holding a valid Manitoba angling license may take all the rainbow trout they can catch by hook and line fishing.

Norris Lake has clear water, a high primary food content, a good oxygen content in open water, and was judged by departmental biologists to be suitable for summer production of rainbow trout.

Some 2,700 yearling rainbow trout were planted in the lake last June 7, and a recent test disclosed an excellent growth rate for the introduced fish.

Departmental officials hope that anglers will harvest a goodly number of rainbow trout during the remainder of the open water angling season which ends October 31 and in the winter angling season which opens November 11. Use of motor boats on Norris Lake is prohibited.

### GREMLIN'S FAULT

A middle-aged Zulu native claims a mysterious "gremlin" that appeared to him while he sipped a witchdoctor's potion would point out victims and made him kill 15 of them for blood. Elifasi Msimu, on trial for the 15 murders, said the gremlin was wished on him by the witchdoctor after he took the potion to bring him luck.

### More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. FASTEX, an improved powder, sprinkled on upper and lower denture plates, forms a soft, cushiony film. It's so comfortable that they feel more comfortable. No more sore cheeks, no more chafing. It's alkaline (non-acid). Does not stain. Check "Fastex" (denture breath). Get FASTEX today at any drug counter.

## Oil seeds used edible purposes for 5,000 years

Oil seeds have been used for edible purposes since the time of the Swiss Lake Dwellers, approximately 5,000 years ago. Dr. A. E. Hannah, of the Canada department of Agriculture Cereal Breeding Laboratory, Winnipeg, Man., reports that research programs on oil seed crops, primarily on flax and safflower, are currently under way.

In addition to breeding programs, the Winnipeg Laboratory is introducing and testing other potential oil seed crops that may have a place in Western Canadian agriculture. Breeding programs will be initiated on the most promising species.

Linseed oil is well adapted to the growing conditions in Western Canada. To date, however, linseed oil has not been used extensively for edible purposes due to its composition. Consequently other oil seed species are being evaluated for the edible oil trade.

Safflower is not grown on a commercial scale in Western Canada yet. The main limiting factors in the economic production of this crop are susceptibility to several diseases and the lack of seed yield.

The safflower improvement project at the Winnipeg Laboratory was started in 1955. Good progress has been made in selecting for early maturity and disease resistance in varieties introduced from other countries. A well organized program should combine disease resistance and other desirable characteristics into one variety.

The safflower has certain advantages from the producer's point of view. It can be handled readily with the machinery used for cereal crop production, and due to its resistance to lodging and shattering, safflower can be straight combined without loss of seed yield.

## Patterns

Easy to make!

by Alice Brooks

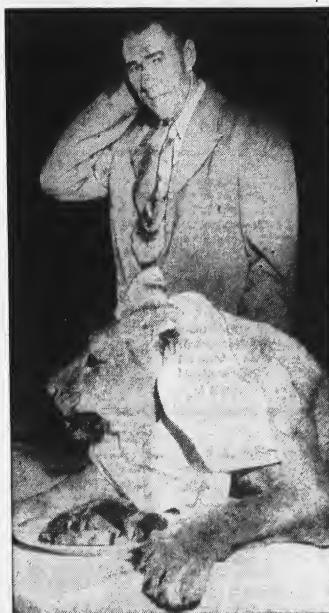

Build your own wooden lawn or patio chairs—easy to do—saves many dollars besides!

Woodcraft Pattern 7385: Simple directions for making lawn, porch or patio chairs. Actual-size paper pattern pieces included, with easy-to-follow number guide.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to: Department P.P.L., Household Arts Department, 60 Front Street W., Toronto

Be sure to write plainly your Name, Address and Pattern Number. Order our 1955 Alice Brooks Needlecraft Catalogue. Enjoy pages and pages of exciting new designs—knitting, crochet, embroidery, iron-ons, toys and novelties! Send 25 cents for your copy of this wonderful book now. You'll want to order every design in it!

The Holy Grail and its quest formed the basis for Tennyson's Arthurian legends and Wagner's drama, "Parsifal".

**LION DINES IN STYLE**—Blondie, social lion of Graham, Tex., enjoys her four large, raw steaks as guest of honor at a breakfast before her departure for New York. Charles Hipp, Blondie's owner is taking the pet lion to Manhattan for an appearance on a TV network program.

## X-Rays helped bring fast medical care to Eskimos

OTTAWA—Doctors reading X-rays in wind-shaken tents and rocking whaling-boats this summer helped bring Eskimos and Indians from Canada's eastern Arctic to proper medical treatment faster than ever before states a Canadian press report.

The plan to develop X-ray film in the Arctic instead of in Ottawa was devised by Dr. John S. Willis, of Ottawa, 38-year-old Eastern Canada superintendent of the Health department's Indian health services.

### Four health parties

This year four health parties—about 22 persons—spent the summer examining and X-raying Eskimos and Indians along the bleak coastlines of Baffin Island, Quebec's far north shore on Hudson Strait, James Bay and the Eastern coast of Hudson Bay.

They brought back new and detailed records of some 5,000 natives. But they had already sent out about 250 natives who were found on the spot to be suffering from tuberculosis and other diseases that required immediate hospital attention.

In the past the X-rays taken on these summer health expeditions were not developed and examined until they were brought back to Ottawa. That meant TB sufferers were not detected until sometimes months after they had been examined and could not be brought to hospital until the next summer.

This summer, however, doctors developed and examined the X-rays on the spot—whether in a tent on an isolated bay or aboard a rocking whale boat used along the rugged coasts.

### 15 Ports of call

Dr. Willis and his five-man party carried out their survey at 15 ports of call visited by the government supply ship C. D. Howe. Another party worked out of the Indian health services hospital at Moose Factory on the east coast of Hudson Bay. Two more covered the south coast of Baffin Island and Quebec's far north shore.

Dr. Willis said that his party got only "a bird's eye view" of the Eskimo health picture from the C. D. Howe. The other groups, however, were after what he termed "a saturation survey," an attempt to check the health of every Eskimo and Indian in the areas covered.

Dr. Barclay McKone, 41-year-old former head of the Moose Factory hospital, who led the Baffin Island expedition said the best way to convince the Eskimos and Indians that they needed hospital treatment once they were found to be diseased was to show them the X-ray.

"They couldn't see a thing," he said, "but it did the trick."

### Robbed robber

UPLAND, Calif. — Police said Henry Calvin, 27, arrested on suspicion of burglarizing several churches in the area, was carrying his "tools"—a Bible and a choir robe.

Calvin told police it was easy to enter churches posing as a choirman, dressed in the robe and carrying the Bible under his arm.

## Recognizing 'potential harm' new drugs major problem

Modern drugs are "wonderful"—scientific progress in devising new ones is "rapid"—but a major problem of any practising physician is how to recognize "the potential harm" of many of them writes Delos Smith of United Press.

This was the sense of an address of Dr. Stuart L. Vaughan of the University of Buffalo School of Medicine at a recent meeting of the Medical Society of the State of New York.

It was called to the attention of a United Press reporter by a medical authority in connection with the scientific report of another professor—Dr. Edgar F. Mauer—on the toxic properties of the anti-arthritis drug, phenylbutazone.

"It is obvious," said Dr. Vaughan "that we owe it to our patients to use new drugs whenever the dangers of the disease outweigh the dangers of the drugs. In so doing we must know both the merits and the dangers of the drugs."

### Risks involved

He said "the type of knowledge" the physician needed "concerns such items as 'recognition of the pattern of drug promotion, the relationship of the practising physician to the pattern, the experimental method as employed in use of a new drug, basic principles of blood production and blood cell depletion, the mechanisms by which drugs may affect normal blood equilibrium, factors determining a drug's toxicity, and the risks involved in use of a drug.'"

Dr. Mauer, in his report in the New England Journal of Medicine, said "physicians are importuned by advertisements and gratuitous reprints to use this drug (phenylbutazone) in a large variety of conditions." Dr. Vaughan said the "sequence of events" going with a new drug "has a rather definite pattern."

This "pattern," he said, is "Laboratory promise—limited clinical trial (in all human beings)—initial encouraging results—broad headlines in the lay press—pharmaceutical fanfare (by the drug's manufacturer)—rumors of trouble—definite reports of dangerous complications—condemnation—re-

### Bright colors safety factor

MADISON, Wis.—Bright colors can be a safety factor, as well as a way to brighten children's back-to-school wardrobes, according to a clothing expert at the University of Wisconsin.

Hazel Paschall said red, Kelly green, yellow, and royal blue are easy for motorists to see, particularly in storms and early dusk. Scarves, mittens, and hats in gay colors can make youngsters stand out even if dark colors are used in coats and snow suits.

Miss Paschall added that light and bright colors are no longer a cleaning problem, with washable, quick-drying synthetic fabrics on the market.

Orlon, scurlan, dyneel, and nylon are found in both outer and inner garments these days. Coats, jackets and trousers in synthetics are less bulky than wool and just as warm.

"Galilee, Nazareth and Beersheba are in Israel, but the greater percentage of places mentioned in the Bible are in Arab territory."

Be a courteous driver!

Decorating is easy with  
**GYPTEX**  
texture paint

### NEW COLOUR AND TEXTURE FOR YOUR ROOMS

GYPTEX gives an attractive, coloured, texture finish in one easy application. Just brush it on, then pat with a sponge or newspaper wrapped in cloth. This modern finish conceals repairs, stains and blemishes in plaster—ideal for decorating wall boards, too.

The walls and ceiling of an average room can be completely GypTexed in a single day. There's no extra painting when you GypTex your walls... GYPTEX is already tinted—comes in White, Tusk Ivory, Desert Buff, Aqua Green, Shell Pink, Silver Grey and Horizon Blue.

Available in 10-lb. package or 25-lb. bag from your paint or hardware store.

## A Good Place To Spend Money

(Calgary Herald)

It's no secret to anybody that the coal industry in Alberta is in bad shape and seems to be getting worse rather than better.

If coal comprised only a relatively minor part of this province's natural resources it would be bad enough, but the fact is that this

province contains 48 per cent of the known coal reserves in the whole of the Dominion. Therefore it is a major national resource which is in a bad way, and in an era with an almost insatiable appetite for power that is serious.

Therefore it is good to hear that the Alberta Research Council is embarking on an expanded program of research in regard to coal. W. A. Lang, the council's secretary, in announcing the new re-

search project says: "It is recognized that future research on coal must not only attempt to develop more efficient and attractive means for traditional uses but it must endeavor to find new uses for coal."

Mr. Lang says that the new fundamental research program will set emphasis placed on the constitution and behavior of coal. The council will continue to keep classical coal-utilization schemes under scrutiny, but the major objective will be to find new ways of utilizing coal, to develop new markets and even perhaps recapture old ones which have been lost to competing fuels.

Well, as we said earlier, this is good, but is it really good enough? It is a start, and the Alberta Research Council is to be commended for it, but it is difficult to es-

cape the feeling that Canada, and especially those most closely concerned with Canada's coal resources, are only nibbling at this problem when an all-out effort is plainly indicated.

The coal problem, in our opinion, ought to be much more of a national concern than it is. Nevertheless, entirely aside from the fact that natural resources are a provincial matter, it seems to us that the province of Alberta itself, through its government, would be more than justified in launching a vigorous research and development program which would place Alberta in the least in this field.

Alberta has nearly half the coal which exists in Canada, and therefore it is Alberta which stands to benefit most if, through intensive research, ways are found to re-

store coal to its former importance in the economic field. Any public money spent on acquiring skilled scientists and engineers and special equipment in an effort to transform coal from a dying industry into a dynamic one would be money well spent in the interests of Alberta's future.

We have no idea how much money the Alberta Research Council has available for its proposed new coal research program. Whatever it is, it could justifiably be doubled or tripled or quadrupled.

Diphtheria is one of the most dangerous of the contagious diseases, particularly serious to children under five years of age. To bring down the numbers of cases in Canada, every child should be immunized against the disease. Immunization Week is held the last week in September.
